## Professional Summary

Senior Frontend Developer with 10+ years of experience specializing in **Next.js**, **React.js** and **Angular**. Skilled in developing scalable, high-performance web applications, modernizing legacy systems, and leading UI/UX-driven development. Strong expertise in **JavaScript (ES6+)**, **TypeScript**, and **Flutter**, with proven experience in cross-functional collaboration and delivering impactful digital products.

---

## Experience

### Senior Frontend Developer

#### Turkcell Technology | Istanbul

June 2023 – Present

- Leading frontend development for the **TV+ platform** using **Next.js** and **React.js**.
- Built reusable components and implemented performance optimizations.
- Collaborated with backend and DevOps teams to deliver seamless API integrations.
- Optimized **Core Web Vitals (LCP, CLS)** to enhance SEO, resulting in higher search rankings and improved site discoverability.
- Contributed to the setup and enhancement of the **CI/CD pipeline** for the TV+ Blog and CMS project, improving development efficiency and deployment reliability.
- Contributed to enhancing the performance of the **TV+ platform** by implementing caching strategies with **Redis** and **Nginx Cache**, resulting in faster response times and improved scalability.

---

## Tech-Lead & Co-Founder

### **Myliba | England**

*May 2022 – March 2024*

- Directed technology strategy and led the development of an OKR management product, overseeing both frontend and mobile initiatives.
- Managed the development team and defined technical processes, including architecture design and project roadmaps.
- Designed and implemented system architectures to ensure scalability and maintainability.
- Set up and maintained CI/CD pipelines on Google Cloud, leveraging a serverless architecture to optimize deployment and cost efficiency.
- Deployed projects in Docker-based environments, ensuring consistency across development and production.
- Collaborated with stakeholders to align product vision with technical execution and delivery.

---

## Frontend Developer

### **Atmosware Technology (via Turkcell) | Istanbul**

*June 2023 – November 2023*

- Worked on the **TV+ project** focusing on frontend development with **Next.js** and **React.js**.
  - Improved UI consistency and ensured responsive, scalable design.
-

## Frontend Developer

### Sovos Türkiye | Istanbul

*January 2020 – May 2022*

- Led frontend development across 4 enterprise projects, ensuring migration and updates to the latest Angular versions (v4 → v12).
  - Successfully migrated a legacy AngularJS project to modern Angular, reducing technical debt and improving maintainability.
  - Delivered key applications such as Sovos Cloud Portal, API Fitbulut (Monitoring Screen), and Online Application Form.
  - Collaborated closely with QA and backend teams to ensure seamless integration and high-quality delivery.
  - Standardized frontend architecture and coding practices, which improved developer onboarding and reduced bug rates.”
- 

## Frontend Developer

### Foriba | Istanbul

*January 2018 – January 2020*

- Contributed to the development of **Foriba Cloud Portal**.
  - Supported QA processes by building automation with **Selenium**.
-

## Freelance Web Developer

*January 2014 – January 2020*

Designed and developed two independent projects as part of early entrepreneurship and freelance work experience.

### **Teknomahsen:**

- Built a **technology blog platform** where 3 new articles were published daily.
- Developed the web portal using **React, Bootstrap, and jQuery**, ensuring responsive design and smooth user experience.
- Contributed to both frontend development and platform scalability for continuous content publishing.

### **Öğrencilerim İçin:**

- Created an **educational platform** for teachers to effectively use **Web 2.0 tools** in classrooms.
- Developed a **web portal** with **React** and integrated a **YouTube channel** as part of the learning ecosystem.
- Led the entire development process, from architecture to deployment, providing the first entrepreneurial experience in the EdTech domain.
- 

---

## Education

### **Aydın Adnan Menderes University**

B.Sc. in Computer Education and Technology Training (2013 – 2017)

GPA: 3.17

---

# Skills

## Core Frontend:

**Next.js, React.js, Angular,** JavaScript (ES6+), TypeScript

HTML5, CSS3, Responsive Web Design, Cross-Browser Compatibility

Redux, Context API (State Management)

Tailwind CSS, Bootstrap, Material UI

RESTful API Integration, GraphQL

Webpack, Babel, Vite (Build Tools)

Unit & E2E Testing (Jest, Cypress, React Testing Library)
